

G&G Controls

Ultrasonic Level Sensing

Features:

- Suitable for 4-20mA signal from level sensing head
- Touchscreen HMI to display level
- Hand/Off/Auto control for each pump
- High level alarm with sounder c/w power supplies for 2no. remote beacons
- Volt-free output relays for pump running, pump fault and high-level alarm
- Lifetime warranty on the switching relay
- PPC mild steel enclosure or polyester reinforced with fibreglass (stainless steel available at extra cost)
- Direct-on-line as standard (Star/Delta and inverter starting available as an option)
- Interlocked power isolator with shaft guide to ensure isolator shaft always aligns with door handle

Optional Extras:

- Ammeters for each pump
- Hours run indication for each pump
- Generator inlet
- Seal leak relay and lamp
- Panel heater with thermostat
- Power failure alarm (battery operated)
- Spring-back switches

Input Voltage	415vac
Current Rating (per pump)	1 - 18 amps (specify when ordering)
Control circuit	24vac
Enclosure material	Powder coated mild steel (available in polyester reinforced with fibreglass)
Warranty	12 months (lifetime warranty on alternating relay)
Dimensions	~500mm high x 400mm wide x 200mm deep
Degree of protection	IP65 (IP66 available)
