

G&G Controls

Telemetry - Wastewater Control Panel with Remote Monitoring

Features:

- Connectivity via Wi-Fi, broadband cable or SIM card
- Hand/Off/Auto control for each pump
- Springback switches
- Email alerts for pump trip, high level and connection loss
- High level alarm with sounder c/w 24V DC power supplies for 2no. remote beacons
- Volt-free output relays for pump running, pump fault and high-level alarm
- PPC mild steel enclosure
- Direct-on-line
- Interlocked power isolator with shaft guide to ensure isolator shaft always aligns with door handle
- Overload reset buttons
- Enhanced pump management, eg. when pump 1 is turned to 'off' then pump 2 stays as the duty pump.
- Compatible with Telemetry Dashboard

Input Voltage	The same Telemetry panel can take either 230V or 400V (with no neutral required).
Current Rating (per pump)	1 - 18 amps (specify when ordering)
Control circuit	24V DC
Enclosure material	Powder coated mild steel
Warranty	12 months
Dimensions	500mm high x 400mm wide x 200mm deep
Degree of protection	IP55
